

# KC-135 AIRCREW TRAINING SYSTEM (ATS) (Moore/Puckett)

## **DESCRIPTION OF EFFORT**

Under a 15-year contract, FSSC implements the Aircrew Training System (ATS) for the Boeing KC-135 Stratotanker Aerial Refueling aircraft. Over 3,500 Air Force, Air National Guard, and Air Force Reserve aircrew members receive training annually. In addition, the contract calls for major upgrades to the KC-135 simulators. The Operational Flight Trainers (OFTs) are located across the U.S., England and Japan. Recent mods include Motion, Rehost, Fuel Savings Advisory System (FSAS), Visual Upgrade Effort (VUE), Traffic Collision Avoidance System (TCAS), Block 30, and Aero Sound Motion Program (ASMC). Mods include Formation Flying and Global Air Traffic Management (GATM).

## **QUICK LOOK SCHEDULE**

To Be  
Determined

## **ISSUES**

- GATM not on ATS
- Formation Mod

## **ACTION ITEMS**

- Participate in KC-135 ATS SRB/SPR at FSSC
- Assess GATM build on KC-135 WST
- Engage with FSSC at Denver for WST/ATS impacts

## **FUNDING**
